

## SuperPrice Sprint 2 Planning Notes (Updated)

Team: P08-01

Sprint: Sprint 2

Date: 18th Sep 2023

Attended:

Scrum Master: Ledy

Product Owner: Prakash

Development team:

Anthony Imani - s3950363

Dylan Khan - s3916841

Ledy - s3409664

Ronald Ho - s3436258

Thomas Yao - s3832771

Victoria Needs - s3811305

### 1. Tasks left over from sprint 1

- We were having issues at the very end of sprint 1 getting the backend CI to work on github actions.
- It was working fine locally, but backend tests were not passing on the GH actions machines.
- It was unanimously decided that we would move this ticket to sprint 2.
- The backend CI pipeline and tests are still included in an open PR, they are just not merged into main.

### 2. Goal

Goal for this sprint is to complete the remaining main features from Sprint 1 and enhance the user experience by implementing features related to user reviews and displaying recently purchased items.

### 3. Duration of the sprint

3 weeks

### 4. What is the team's vision for this sprint?

For this sprint, we have a clear and achievable goal: to complete the outstanding items from Sprint 1, namely task ID 7.1, 7.3, 7.4, 8.1, 10.1, and 14.1, which are essential for product functionality. Additionally, we will tackle items 15-23 from Sprint 2's product backlog, ensuring steady progress.

By the sprint's conclusion, users will experience significant improvements. They will be able to efficiently browse products by category, sort items by name or price, and seamlessly complete their purchases. Furthermore, users will have the added convenience of accessing and contributing to product reviews, enhancing their engagement and decision-making process. We will also enable users to effortlessly view their recently purchased items, streamlining their overall experience.

## 5. Estimation in story points

Task ID	Title	Size	Labels	Note
15	User Reviews - User can leave a review of a supermarket	5	Type: Story	This requires wiring backend to frontend
16	User Reviews - User can leave a review of a product	5	Type: Story	This requires wiring backend to frontend
17	Price Comparison - Registered users should only have products displayed within saved area	5	Type: Story	This requires wiring backend to frontend
18	<del>Delivery - Driver can see an optimised route for deliveries</del>		Type: Story	This is removed from Sprint 2 as it is nice to have but is not essential for release.
19	User Interface - User can see recently viewed items	3	Type: Story	This is only rendering the page
20	Notifications - User can receive notifications	3	Type: Story	This is only rendering the page
21	User Reviews - User can see review of products	3	Type: Story	This is only rendering the page
23.1	Delivery - User can choose delivery time	3	Type: Story	This is only rendering the page
23.2	User Interface - Checkout Shipping Page	3	Type: Story	This is only rendering the page
6.2	User Interface - Search Suggestions	3	Type: Task	This is removed from Sprint 2 as it is nice to have but is not essential for release.
7.1	User Interface - Payment Page	3	Type: Story	This is only rendering the page

7.3	Component - Order Summary Component	3	Type: Task	This is only rendering the component
7.4	Backend - Processing payment query	5	Type: Task	This is only rendering the page
8.1	Categorisation - User can browse product by category	3	Type: Story	This is only rendering the page
<del>8.3</del>	Component - Load More Button	1	Type: Task	This is removed from Sprint 2 as design has changed and we no longer require this component.
10.1	User Interface - Checkout Address Page	5	Type: Story	This is only rendering the page
14.1	User Interface - Cart Page	5	Type: Story	This is only rendering the page
